Canine Heartworm Check

Limit one coupon per dog

Offer valid 03/01/2018 – 4/30/2018

Coupon must be presented at time of appointment

Canine Heartworm Disease is prevalent in Iowa. It is carried from dog to dog by mosquitoes. It is important to have your dog checked each year with a simple blood test run in our clinic.

After testing negative to heartworms we recommend your canine friend be put on Heartworm Preventative year-round or April through December to avoid contracting the disease. Call our knowledgeable staff with any questions.
