Limit one coupon per pet
Offer valid through 12/31/2020

Coupon must be presented at time of appointment

Give your pet the gift of improved health by having them spayed or neutered.

Not only does this help decrease the number of homeless animals but also helps control many health issues.

Having your male dog neutered stops his risk of testicular cancer and infections
as well as greatly reduces prostate disease and cancer.

A spayed female will not have problems with uterine or ovarian cancers and infections.

It also minimizes their chance of breast cancer.
